Monongahela Valley Hospital's Occupational Health Program offers comprehensive employer medical services to help keep employees on the job and working at peak performance. Partnering with area businesses, MVH OH provides injury treatment and ongoing case management of job-related injuries and illnesses, physical exams, drug testing, job analysis and other services.

Elaine S. Gelb, M.D. is the medical director of Monongahela Valley Hospital's Occupational Health Program.

In addition to her occupational medicine credentials, she has an extensive background in emergency medicine.

Monongahela Valley Hospital's Occupational Health Program can tailor an occupational medical program to any company, no matter how large or small.
